ST LEONARDS ON SEA COMPANY EXCELS AT BEST PRACTICE

A St Leonards on Sea manufacturer has become one of the first companies in the South East to receive special recognition from the Manufacturing Advisory Service (MAS) for its commitment to continuous improvement.

Technoturn was among 14 companies presented with an award by MAS South East at the inaugural Best Practice Network conference, held at the BMW Mini plant in Oxford.

The Network has been set up by MAS South East to encourage regional manufacturers to share knowledge, expertise and experience in developing their companies – and so far the 60 members have added £10 million of value to their businesses in just 12 months.

“Technoturn has demonstrated outstanding commitment to continuous improvement as a result of its participation the Best Practice Network covering East Sussex – the company is an excellent example to its peers,” comments Mark Knowlton, MAS South East Partner Manager.

Our picture shows Gary Stocker and Philip Palmer of Technoturn receiving the award at the conference from business improvement guru David Hall.
